-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

First Species: Figures 1-5,

Second Species: Figures 6-7,

Third Species: Figures 8-9,

Fourth Species: Figure 10,

Fifth Species: Figures 11-14,

Sixth Species: Figure 15,

Seventh Species: Figure 16,

Eight Species: Figure 17, and

Ninth Species: Figure 18

The species are independent or distinct because the:

First Species – directed to a network system employing an operation limiting system and a camera-equipped mobile communication terminal used in an operation limiting system;

Second Species – directed to a camera-equipped mobile communication terminal used in an operation limiting system including an emergency communication detector;

Third Species – directed to camera-equipped mobile communication terminal used in an operation limiting system including a face recognizer and a face image database;

Fourth Species – directed to camera-equipped mobile communication terminal used in an operation limiting system including an emergency communication detector, a face recognizer, and a face image database;

Fifth Species – directed to a network system employing an operation limiting system including a Global Positioning System;

Sixth Species – directed to camera-equipped mobile communication terminal used in an operation limiting system including a Global Positioning System;

Seventh Species – directed to camera-equipped mobile communication terminal used in an operation limiting system including an emergency communication detector and a Global Positioning System;

Eight Species – directed to camera-equipped mobile communication terminal used in an operation limiting system including a Global Positioning System, a face recognizer, and a face image database; and

Ninth Species– directed to camera-equipped mobile communication terminal used in an operation limiting system including an emergency communication detector, a Global Positioning System, a face recognizer, and a face image database.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 2622

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carramah J. Quiett whose telephone number is (571) 272-7316. The examiner can normally be reached on 8:00-5:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, NgocYen Vu can be reached on (571) 272-7320. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
